PRECAST TUNNEL LINER

CUSTOM PRECAST CONCRETE PRODUCTS USED IN LARGE DIAMETER TUNNELS

PRECAST TUNNEL LINER

Armtec's tunnel liners are specialized precast concrete products used in large-diameter, bored tunnels. The liners are manufactured to a specific design radius in a series of segments. Segments are installed in the field to form a complete ring that supports the surrounding soil and rock.

Consistent quality

Proven strength, durability and dimensional accuracy of precast concrete

Custom fit

Segment thickness, length and radius designed for specific tunnel requirements

Assured supply

Pre-purchase and manufacture eliminates construction delays

Cost-effective

Precast tunnel segments are more economical than poured-in-place large diameter tunnels

TYPICAL APPLICATIONS

- Transit applications (subways, light rail)
- Sewer and water conduits

REPRESENTATIVE DRAWING
